

Enable Healthcare Inc.

Connecting Providers, Patients and Payers

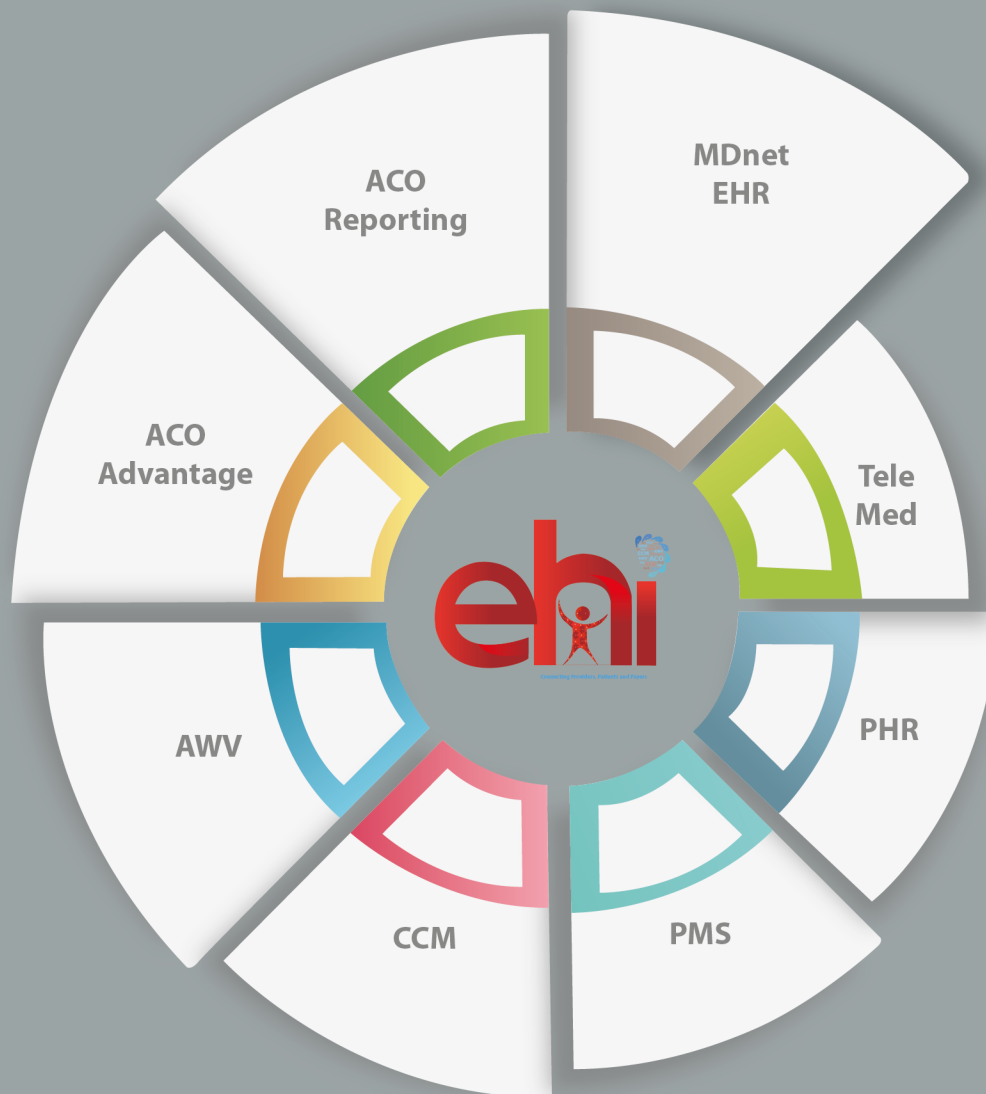

EHI is at the fore front of technological innovation and integration of clinical data to provide a holistic view to a Provider and create intelligence and analytics to help provide highest level of care. EHI's applications are simple, intuitive, advance in intelligence and connected with facilities, public exchanges, health networks and millions of Providers. Technological integration at the Physician office should not be a barrier but as a key facilitator to improve Patient care, and create business and financial efficiency through automation.
